# The Advantage of Diabetic HQ

## Wide Selection of Brands & Products.

Nearly 10,000 products from more than 300 manufacturers in the brands you prefer.

## Comprehensive Distribution Network.

Free shipping on orders arriving in 1 to 2 business days, once order is processed\*.

## Convenient Ordering Process.

Our dedicated Account Reps and Insurance Experts take care of all the paperwork.

*\*Processing typically takes up to four days for the first order and three days for re-orders. Orders are subject to delays in receiving prescription information, insurance authorization or other medical documentation.*

## One of the Industry Leaders in Selection

We carry nearly 40,000 products from more than 700 manufacturers. Meaning, you will have access to the brands and generics you want.

# Diabetic Testing Supplies Information

Perhaps the most important aspect of good diabetes management is keeping track of your blood glucose (blood sugar) levels with a regular testing schedule to understand what your results mean.

## Blood Glucose Monitoring System

When you test, the monitor shows an important number followed by “mg/dL” (milligrams per deciliter) or “mmol/L” (millimole per liter), which tells you the amount of blood glucose is in your bloodstream. The number changes throughout the day depending on a number of factors, which includes, food consumption, amount of sleep, and exercise.

Here are some average glucose ranges for adults:

- After fasting for at least 8 hours (wake from sleep): 90-130 mg/dL (5.0-7.2 mmol/L)
- Levels before meals: 70-130 mg/dL (3.8-7.2 mmol/L)
- One to two hours after a meal: Less than 180 mg/dL (10 mmol/L)

Talk to your doctor about setting your target ranges and when the optimal test times are for you. If you notice that your levels are higher (hyperglycemia) or lower (hypoglycemia) than your set target ranges consistently, let your doctor know immediately. That way, your doctor can adjust your diabetes management plan and set new targets to help prevent long-term complications.

---

### *More Information:*

## Test Strips

Test Strips are used to take and insert a sample of your blood into a monitor for your blood glucose. Usually packaged in multi-strip drums, discs, or individual strips. Each package of test strips needs to match with the correct monitoring device.

## Control Solution

Control Solution is a liquid replacement used instead of a blood sample to test a new monitor for proper function, and should be used with every new package of test strips.

## Lancet / Lancing Device

A Lancet/Lancing devices are a one-time use tiny needle used to pierce the testing area for a blood sample. These devices should never be reused, due to potential contamination and can cause an infection.

## Logbook

Make sure to keep of a log of your results for each test, that way it's easy to keep track of your glucose levels to see how your improving.

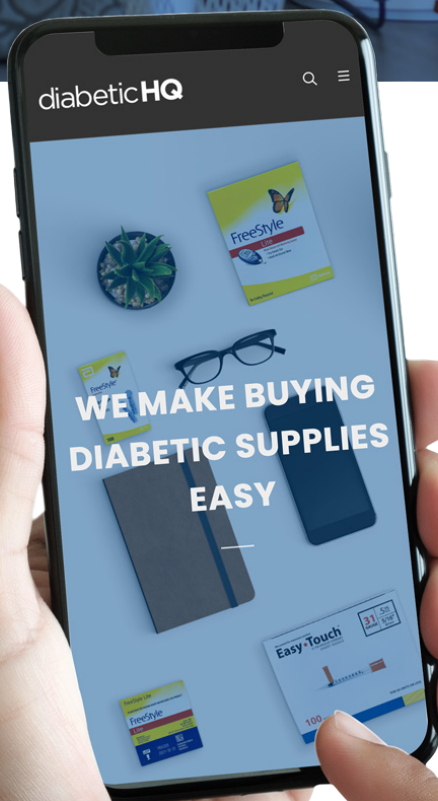

**Easily Order Your Supplies and Reorder Them Anytime!**

## Register or manage your account anywhere

Use our new website as a one stop shop to access all of your diabetic supply needs. Check your order status, reorder supplies, make and keep up to date with your payments, and enroll in text message updates.

# Supply Ordering Information

At Diabetic Headquarters we want to be transparent about our supply ordering information, which includes our shipping and return policies. Please read about them more below.

## Shipping

Most orders are mailed directly to your door at no shipping cost.

*If you have any questions concerning shipping costs, please contact one of our sales representatives at **855.446.7004** or email **Sales@DiabeticHQ.com**.*

## Diabetic HQ Return Policy

Ordered items may be returned for a refund or exchange in 30 days from the shipped date if the items are new or unopened. The return shipping cost must be covered by the customer. When submitting a return shipment, it's recommended that you use a shipping method that provides tracking and confirmation, that said, Diabetic HQ is not responsible for products that are lost during shipping.

A Diabetic HQ sales representative will supply you with an RMA (Return Merchandise Authorization) number, so please reach out to a rep before submitting a return shipment. The supplied RMA number must be clearly written on the outside of the packaging of the return shipment. The return must be received by Diabetic HQ within 30 days of supplying said RMA number to be accepted.

When the item is received, the package will be inspected by Diabetic HQ and will only issue a return or exchange of said item if it's in the original packaging and is in an acceptable condition to be re-sold. An item will be rejected for a return or exchange if it's found to be in one of the following conditions:

- The safety seal is broken
- If the item has already expired or is within 180 days of expiration
- If it's a safety item for the bath (including tub rails, shower benches, shower chairs, transfer benches, walkers, toilet seats, and scales)
- If it's a food or nutritional item
- If the item is hygiene-related (hernia belts, hose/stockings, OPTIONS™ undergarments)
- If the item is a custom/special order (for example, custom pouches or support belts)

Specialty products and devices are subject to the return policy of the manufacturer. Some examples of specialty items are not limited to but include the following items: continuous glucose monitors, Omnipod® products, and insulin pumps.

Diabetic HQ will issue the return to the same form of payment used while ordering. If an order is canceled after shipping has been initiated, said order is subject to those same return policies.

### **Missing, Incorrect, or Defective Items:**

To ensure that your order is correct, please look over your order as soon as you receive it and compare it to the packing slip. Please contact us within two days after receiving your order if there are any damaged items or discrepancies. In that time, you will receive a new RMA number and we will work with you to correct your order quickly.

## LIFESCAN PRODUCTS

### OneTouch® Verio® Flex™ System

A glucose monitor system is intended to be used by an individual with diabetes to keep track of their blood glucose levels at home. The ColourSure™ technology returns instant results so the user can see if they're in or out of their target range. This kit includes the monitor, lancing device, lancets, carrying case, and owner's/get-started booklets.

DESCRIPTION	SIZE

# We Have What You Need for Multiple Daily Injections!

## We offer a wide variety of products from popular brands and gauge sizes

---

We want to have you covered whether you want to inject insulin with pen needles or syringes. You'll also find that we have a variety of accessories for easier injection, safe disposal for needles, and more comfort.

### Syringes

We offer syringes with the newest technologies like fine-point tips and electropolished needles for the smoothest injections possible.

### Pen Needles

Our pen needles are available in the smallest sizes in diameter and length for the least painful injections possible.

### Sharps Containers

We offer containers to safely get rid of used syringes and pen tips.

### Prep Wipes

Be sure to keep enough prep pads on hand so injection points can be as clean as possible.

## BECTON DICKINSON

**BD Ultra-Fine™ Nano Pen Needles**

These are the thinnest and shortest pen needles available. Proven clinically to be just as effective as the longer pen needles for people of a variety of sizes, while not needing to pinch the skin for testing. Universally fits all dosers and insulin pens that are sold in the U.S.

DESCRIPTION	SIZE
BD Ultra-Fine™ Nano Pen Needles	90/box

## BECTON DICKINSON

**BD Ultra-Fine™ Mini Pen Needles**

These needles provide injections that are reliable for all sizes of patients, eliminating the need to pinch the skin while testing. Universally fits all dosers and insulin pens that are sold in the U.S.

DESCRIPTION	SIZE
BD Ultra-Fine™ Mini Pen Needles	90/box

## BECTON DICKINSON

**BD Ultra-Fine™ Short Pen Needles**

Universally fits all dosers and insulin pens that are sold in the U.S.

DESCRIPTION	SIZE
BD Ultra-Fine™ Short Pen Needles	90/box

**BD Ultra-Fine™ Original Pen Needles**

These needles are recommended for individuals that have issues with dexterity or those that have to take larger doses. Specifically, these pen needles feature an inner diameter that is wider which allows for easier dispersal of the insulin.

DESCRIPTION	SIZE
BD Ultra-Fine™ Original Pen Needles	90/box

**BECTON DICKINSON**

**BD Insulin Syringes with BD Ultra-Fine™ Needle**

These syringes are designed for comfort and smoothness due to the electropolished needles. It also features a microbonded lubrication on the needles for limited friction, as well as, easier insertion due to a fine-point needle tip.
